The company

New World Precious Metals (NWPM) was established in 2016. Head office is in Calgary, Canada and serves clients across the globe. We are an approved brokerage firm for one of the world's leading wholesale bullion providers, Precious Metals International. We are also proud partners of Canada's largest independent online brokerage, Questrade, Inc.

The team

Our experienced team of precious metals brokers is here to educate, support, and facilitate your asset ownership: we do the research so you will always have access to up-to-date, leading industry information from a roster of experts. Getting into the market at the right time is half the battle, but knowing when to sell is the other.

The specifics

We offer an easy, safe, and affordable platform to invest in the highest grade, wholesale priced, gold and silver. You have the option to place stop orders, use your holdings as a line of credit, and take delivery of your bullion anytime. In addition, our partnership with Questrade gives us the unique opportunity to facilitate the penalty-free transfer of registered accounts (like RRSPs) into physical bullion.

The fine print

Our bullion is fully insured, allocated, and segregated at internationally recognized depositories and all transactions are subject to regulatory processes. NWPM retains storage contracts with the world's most respected private valuables assurance companies, so our clients can safely store and maintain their product pretty much anywhere.

International Investment Account

IT'S BETTER OUTSIDE THE BANK

Our Wholesale Investment Accounts offer: premium gold & silver bullion at wholesale prices, safe storage with the world's most respected private assurances companies, the flexibility to use your holdings as a line of credit, and the safety & security of international jurisdiction. We looked around the world for the best platform to invest in silver & gold - this is it.

Throughout history physical precious metals have been characterized by their ability to preserve value. Their purchasing power has not only been maintained, but has increased over time. Many respected analysts estimate that the value of these products will not only increase, but multiply in the coming years. Today, one of the best ways to secure a more stable financial future, despite the global economic environment, is diversification in silver & gold.

Registered Accounts

IT'S TIME TO TAKE A DEEPER LOOK AT YOUR INVESTMENTS

We believe in balanced investing: it is worthwhile to hold a percentage of your assets outside the banking system. Registered accounts exist within the system, but our Registered Account Transfer Program blends institutional benefits with the security of an asset class that has held its value for 5000 years. Adding real assets like gold & silver to your RSPs, stored at leading private depositories, will protect and grow your wealth.

We can help transfer your TFSA, RRSP, LIRA, LIF & most Registered Accounts into gold and silver bullion (penalty-free).

RETAIL DELIVERY

Build your wealth in ounces.

Take your financial future into your own hands by investing in silver and gold through Direct Delivery. Our commitment to you is to provide extraordinary service throughout your bullion buying experience. Receive high quality retail products at competitive prices through a dedicated & knowledgeable personal broker.

All deliveries are fully insured and delivered through reputable shipping partners.

Known as the original investment, precious metals embody both practical and metaphysical properties: they are ethereal and grounding and timeless... best of all, anyone can benefit from owning coins and bars regardless of their market experience.

CORPORATE ACCOUNTS

It's better outside the bank.

Precious Metals Corporate Accounts offer great protection for companies' treasuries. Explore the benefits of holding company reserves in gold & silver instead of cash, protect a portion of operational capital outside of local reach, and receive access to a line of credit available against holdings at attractive rates.

Leaving cash in the bank is costly and it loses value against inflation. Liquidity and access to these in your bullion account is immediate.

Receive premium bullion at wholesale prices, safe storage with the world's most respected private assurances companies, the flexibility to use your holdings as a line of credit, and the safety & security of international jurisdiction. We looked around the world for the best platform to invest in silver & gold - this is it.
